

# South sudan large capacity solar container battery factory

## Overview

---

Its 15,000m<sup>2</sup> plant in Richmond, Cape Town, became the first gigawatt factory on the continent when it began operations in July 2024. The facility can produce up to 3,000 megawatt-hours (MWh) or 3 gigawatt-hours of storage capacity per year. The project consists of a 56 kWp grid-tied solar photovoltaic (PV) system with an integrated 80 kWh battery storage solution, designed for self-consumption and backup power during. Technological advancements are dramatically improving solar storage container performance while reducing costs. The Ezra Group, a leading business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant along despite having abundant energy resources, particularly f. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an e energy. The Red Sands project will be the largest standalone BESS to reach this stage on the continent, designed to store power during off-peak hours and release it when demand is highest—providing essential grid stability and flexibility for South Africa's electricity network.
