

Support the development of microgrid solar container

Overview

This study aims to determine whether solar photovoltaic (PV) electricity can be used a ordably to power container farms integrated with a remote Arctic community microgrid. Paired Power's modular microgrid targets remote industrial and agricultural applications and rural electrification for Indigenous communities. These systems dynamically balance supply and demand to deliver stable, uninterrupted power. Two configurable solar power and battery storage systems form the core of our product offerings: the SolarContainer and the MiniBox. A mixed-integer linear optimization model (FEWMORE: Food-Energy-Water Microgrid Optimization with Renewable Energy) has been.
