Built-in battery in car beam

The battery is installed in the car beam

Pack the battery in the box

This the battery installation box, replace the battery core without changing the shell

Ebike battery

Overview

No, you're not sitting on a lost power bank - you're experiencing the magic of an electricity-storing sofa, the latest crossover between furniture design and energy tech. These aren't your grandma's upholstered relics; we're talking about couches that moonlight as backup power. By day, it's a stylish sofa; by night, it transforms into a comfortable bed, adding both practicality and beauty to your home. The generous sleeping surface fits two people with ease, while the smart storage keeps essentials tidy, and the 5-level. Sleeper sofas are the true champions of functional furniture (couch when you want it, bed when you need it!) After testing one myself and examining years' worth of The Spruce's testing, I learned firsthand how tricky it is to find the right one, as not many impress us.
