

# U s household solar container scale

## Overview

---

single-family homes, including mobile homes, generated electricity from small-scale solar systems (solar panels installed on a home or building), according to our 2020 Residential Energy Consumption Survey (RECS). We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. Growth is driven by the rising adoption of off-grid and hybrid power solutions, especially in remote, disaster-prone, and developing. These containers serve a dual purpose: they can be utilized for power generation and as mobile energy storage solutions.
