

Ventilator for nicosia solar container

Overview

Designed for easy installation in standard rectangular vent openings, this self-sufficient unit utilizes solar energy to power a high-efficiency fan, promoting continuous airflow and preventing moisture buildup, mold growth, and overheating. The custom-designed aluminum framing kit allows the BigAir™ 57 CFM Solar Vent to be installed anywhere on shipping container sidewalls, end walls, or doors – from floor to ceiling. Eliminate moisture and excess heat with our state-of-the-art computer-modeled design! Designed to be installed. The vent comes with a 11 7/8 x 14 11/32 range hood filter (Bug Screen) In order to exhaust the full 400 CFM, 2 Big Air 45 Vents are required for air intake. This solar roof vent runs on the sun's power which eliminates your need for electricity and helps you reduce your energy use and carbon impact. Protect your container from heat and moisture with high-quality venting solutions. No cords or electricity required! The Shipping Container Solar Powered Rectangular Vent is an innovative solution for maintaining optimal air quality and temperature inside shipping containers.
