

What does solar container demand response subsidy mean

Overview

The Self-Generation Incentive Program (SGIP) is a California financial rebate program. The program helps residential and non-residential customers have power during planned and unplanned power outages. LADWP's Demand Response (DR) is an incentive based, voluntary energy management program for businesses that helps reduce their utility bills during times of peak power demand, ensuring the continued reliability of power for Los Angeles. Let's break down how these programs work—and why 2025 might be your best year to cash in. Demand response refers to balancing the demand on power grids by encouraging customers to shift electricity demand to times when electricity is more plentiful or other demand is lower, typically through prices or monetary incentives. The variability of solar and wind power requires flexible demand management to maintain reliable electricity service, making demand response programs crucial.
