

Which field should i apply for a senior engineer in solar container

Overview

Expertise in one or more of these areas: Power electronics, Battery storage system design, Substation design, Generation tie design. Understand specifications for major equipment purchasing, ensure clear communication, and propose solutions. As a solar photovoltaic (PV) and smart-grid (energy storage) design and engineering firm, we are a strong team dedicated to leveraging engineering principles and methods to improve the environment, support the financial and economic benefits of renewables, while providing a high standard of service. The Senior Solar Project Engineer will be responsible for leading the engineering design and technical project management for solar PV projects, including rooftop installations, ground-mounted systems, and single-axis tracker systems. Bachelor of Science degree or PE license in electrical, mechanical, civil or other. The role involves leading the strategic development and execution of Pure's core container platform, overseeing its reliability, security, and scalability, while managing a high-performing engineering team responsible for container runtime and orchestration across storage products.
