## Overview

---

Figure ES-1 shows the suite of projected cost reductions (on a normalized basis) collected from the literature (shown in gray) as well as the low, mid, and high cost projections developed in this work (shown in black). In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an analysis of recent publications that include utility-scale storage costs. According to data made available by Wood Mackenzie's Q1 2025 Energy Storage Report, the following is the range of price for PV energy storage containers in the market: We will also discuss various factors that influence these changes, including the commercialization of technologies and innovation scenarios.
