

# Year user-side solar container capacity gaogong lithium battery

## Overview

---

According to preliminary research from Gaogong Industry Research Institute (GGII), China's lithium battery shipments reached 786 GWh in Q1-Q3 2024, marking a 30% year-on-year increase. In terms of capacity expansion, according to the statistics of Gaogong Lithium Battery, CATL has planned eight self-built production bases with a total battery production capacity (including PACK) of about 500GWh. From lithium-ion batteries to flow batteries, new materials, and next-gen supercapacitors, various innovations are poised to reshape energy storage paradigms. The US remains at the center of the global energy storage industry, with California having surpassed 7GW of grid-scale energy storage installations, ERCOT going from strength to strength, and Yuejiang Zhong Road, Guangzhou, China. In 2023, the energy storage lithium battery industry ushered in great changes in technology, price, industrial pattern and other fields.
