

Zongmu technology solar container parking

Overview

With over a decade of expertise in the renewable energy industry, we specialize in advanced solar storage systems that provide seamless power solutions for both residential and commercial properties. These include a fully autonomous parking solution that automatically parks the vehicle in the nearest parking space, or the space defined by a "smart" parking lot, after the passenger arrives at the Dou Taihu Lake Group and Jingkai Capital. The AVP product/service from ZongMu Technology (ZongMu) aims to solve the most difficult parking problems with the integration of the intelligent driverless vehicle, the smart garage infrastructure and the cloud-based service. Zongmu Technology is a series E company based in Shanghai (China), founded in 2013 by Rui Tang. It operates as a Tech-enabled platform offering ADAS and autonomous driving solutions.
